

Listing of Claims:

1

1 **Claim 1.** (currently amended) A pet food storage container, comprising:

2 a housing defining a main chamber and an opening for accessing said main
3 chamber opening, said main chamber defining a height, said housing defining an outer
4 surface having a bottom wall;

5 a platform movable along said height;

6 elevation adjusting means attached between said platform and said housing, said
7 elevation adjusting means configured to move said platform along said height, said
8 bottom side configured to prevent said elevation adjusting means from extending through
9 said housing; and

10 a lid configured to cooperate with said housing to close said opening.

1 **Claim 2.** (original) The container of Claim 1, wherein said housing further comprises
2 at least one rolling means for enabling said housing to be rolled disbursed on said
3 housing.

1 **Claim 3.** (original) The container of Claim 2, further comprising a first handle
2 extending generally upwardly from said housing.

1 **Claim 4.** (currently canceled)

1 **Claim 5.** (currently amended) The container of Claim 34, wherein said elevation
2 adjusting means comprises at least one biasing device.

1 **Claim 6.** (original) The container of Claim 1, further defined by a tray extending from
2 said housing.

1 **Claim 7.** (original) The container of Claim 6, wherein said housing is defined by a pair
2 of side walls and said tray further comprises an attachment device attached to each said
3 side wall.

1 **Claim 8.** (original) The container of Claim 7, wherein said attachment devices
2 comprise pivotable connections between said tray and said side walls.

1 **Claim 9.** (original) The container of Claim 7, wherein said housing is further defined
2 by a front wall, said container further comprising a second handle extending from said
3 front wall.

1 **Claim 10.** (original) The container of Claim 9, further comprising at least one auxiliary
2 container disposed on at least one said side wall or front wall.

1 **Claim 11.** (original) A combination vendor pet food package and mobile pet food
2 storage container, the combination comprising:

3 a vendor pet food package comprising a bag defined by a bottom, a top and an
4 opening at said top; and

5 a mobile pet food storage container comprising a housing defining a main
6 chamber, at least one wheel extending from said housing and a platform configured for
7 resting said package thereon, said platform attached to said housing in said main
8 chamber.

1 **Claim 12.** (original) The combination of Claim 11, wherein said mobile pet food storage
2 container further comprises a tray hingeably attached to said housing.

1 **Claim 13.** (original) The combination of Claim 12, wherein said housing is further
2 defined by a rim creating an opening for accessing said main chamber, said mobile pet
3 food storage container further comprising a lid attached to said housing.

1 **Claim 14.** (original) The combination of Claim 13, wherein said lid further comprises a
2 sealing gasket means for creating an airtight seal between said lid and said housing.

1 **Claim 15.** (original) The combination of Claim 14, wherein said mobile pet food storage
2 container further comprises a first handle, said first handle attached to said housing by at
3 least one telescoping strut extendable therefrom.

1 **Claim 16.** (currently amended) A mobile pet food storage container, comprising:

2

3 a housing defining a main chamber and an opening for accessing said opening,
4 said main chamber defining a height;

5 a platform movable along said height;

6 elevation adjusting means attached between said platform and said housing, said
7 elevation adjusting means configured to move said platform along said height, said
8 elevation adjusting means fully contained within said housing without the ability of
9 protruding outwardly therefrom;

10 a tray extendable from said housing; and

11 a lid configured to cooperate with said housing to close said opening.

1 **Claim 17.** (original) The container of Claim 16, wherein said housing is defined by a
2 pair of side walls and said tray further comprises an attachment device attached to each
3 said side wall.

1 **Claim 18.** (original) The container of Claim 17, wherein said attachment devices
2 comprise pivotable connections between said tray and said side walls.

1 **Claim 19.** (original) The container of Claim 18, wherein said housing further comprises
2 at least one rolling means for enabling said housing to be rolled disbursed on said
3 housing.

1 **Claim 20.** (original) The container of Claim 19, further comprising a first handle
2 extending generally upwardly from said housing.
